MAGERIT

A TRIBUTE TO MOTHER EARTH

## The Origin of Creation

From an admiration for the earth as the center of all creation, Gea was born, a collection inspired by the origin of life and the harmony of nature.

The careful fusion between fantasy and realism offers amazing creations that breathe delicacy and femininity. The chromatic variety is especially important, offering freshness and warmth to the original designs. The use of blue and green stones recalls the colours of the earth.

Organic motifs that make reference to seeds, petals and flowers abound. The figurative touch, always present in the brand's collections, is the protagonist in the most important proposals of the collection.

As in nature, every Magerit creation represents a unique, original and unrepeatable piece.

A person is lying on a bed, partially covered by a light green, textured fabric. The person's arms and legs are visible, extending outwards. The background is a dark, textured surface, possibly a wall or a large piece of fabric. In the center of the image, the letters 'G', 'E', and 'A' are displayed in a black, serif font. Each letter is surrounded by a soft, glowing blue and white aura, giving them a magical or ethereal appearance. The overall mood is serene and mysterious.
